(a)
Zero-force wall color distortion
Original recoloring
Balanced neutral wall
Segregation strength, β
(b)
Maximum speed (lattice units)
Raw corrected CSF
Adjacent-step average (diagnostic)
Uncorrected CSF
Manufactured equilibrium maximum
Slit width, H
(c)
Alternating raw velocity
Wall-adjacent u_x/U_{max}
Tangential cell index
(d)
Laplace discrepancy (%)
Normal derivatives
Gradient derivatives
Bulk droplet radius (cells)
